ANALYTICA CHIMICA ACTA

International journal devoted to all branches of analytical chemistry

(Abstracted, Indexed in: Anal. Abstr.; Biol. Abstr.; Chem. Abstr.; Curr. Contents Phys. Chem. Earth Sci.; Life Sci.; Index Med.; Mass Spectrom. Bull.; Sci. Citation Index; Excerpta Med.)

VOL. 199 **CONTENTS** **AUGUST 15, 1987**

Review

Stat methods in analytical chemistry. Kinetic techniques for catalyzed and uncatalyzed reactions
S. Pantel (Freiburg, F.R.G.) 1

General Analytical Chemistry

Multidetection flow-injection techniques for manipulation of sensitivity. Amplification and dilution methods
A. Ríos, F. Lázaro, M. D. Luque de Castro and M. Valcárcel (Córdoba, Spain) 15

Versatile automatic stopped-flow system for routine analysis
A. Loriguillo, M. Silva and D. Pérez-Bendito (Córdoba, Spain) 29

Optimization of single-column anion chromatography with indirect ultraviolet photometric and fluorimetric detection
S. Rapsomanikis and R. M. Harrison (Colchester, Gt. Britain). 41

The effect of substituents on the extraction behavior of hydroxamic acids
M. Hojjatie, T. Cecconie and H. Freiser (Tucson, AZ, U.S.A.). 49

Electrometric Methods

Determination of nickel, cobalt, copper and uranium in water by cathodic stripping chronopotentiometry with continuous flow
M. P. Newton and C. M. G. van den Berg (Liverpool, Gt. Britain). 59

Determination of caprolactam by adsorptive voltammetry after separation by thin-layer chromatography
Z. Tocksteinová and M. Kopanica (Prague, Czechoslovakia). 77

An amperometric sensor for carbon dioxide based on immobilized bacteria utilizing carbon dioxide
H. Suzuki (Atsugi, Japan), E. Tamiya and I. Karube (Yokohama, Japan) 85

Microbial electrode sensor for vitamin B_{12}
I. Karube, Y. Wang, E. Tamiya and M. Kawarai (Yokohama, Japan) 93

Computer Methods and Applications

Descriptions of molecular shape applied in studies of structure/activity and structure/property relationships
R. H. Rohrbaugh and P. C. Jurs (University Park, PA, U.S.A.) 99

Spectrometric Methods

Laser-excited ionic fluorescence spectrometry of rare-earth elements in the inductively-coupled plasma
M. E. Tremblay, B. W. Smith and J. D. Winefordner (Gainesville, FL, U.S.A.) 111

Inductively-coupled plasma/atomic emission spectrometry of sulfur with a vacuum scanning spectrometer and its application to the analysis of coal liquefaction catalysts
M. Kubota, R. A. Reimer, K. Terajima, Y. Yoshimura and A. Nishijima (Ibaraki, Japan) 119

Differential determination of antimony(III) and antimony(V) by indirect spectrophotometry with chromium(VI) and diphenylcarbazide, after reduction of antimony(V)
N. Yonehara, T. Fuji, H. Sakmoto and M. Kamada (Kagoshima, Japan) 129

A simple stopped-flow method with continuous pumping for the spectrophotometric flow-injection determination of boron in plants
M. A. Z. Arruda and E. A. G. Zagatto (Piracicaba, Brazil) 137

The S_2 emission characteristics of several organic sulfur compounds obtained by molecular emission cavity analysis and pyrolysis
K. Nakajima and T. Takada (Tokyo, Japan) 147

Short Communications

The pH-static enzyme sensor. An ISFET-based enzyme sensor, insensitive to the buffer capacity of the sample
B. H. van der Schoot and P. Bergveld (Enschede, The Netherlands) 157

(Continued overleaf)

(Contents continued)

Anodic response to oxygen of an electrochemical detector in high-performance liquid chromatography and flow-injection analysis
J. B. F. Lloyd (Birmingham, Gt. Britain) . . . 161

Determination of mercury traces by differential-pulse stripping voltammetry after sorption of mercury vapour on a gold-plated electrode
F. Scholz, L. Nitschke and G. Henrion (Berlin, G.D.R.) . . . 167

Determination of cyanuric acid in swimming pool water by differential pulse polarography
J. Struys and P. M. Wolfs (Bilthoven, The Netherlands) . . . 173

Determination of surface-active compounds in precipitation studies by a.c. polarography
N. Batina, B. Ćosović and Dj. Težak (Zagreb, Yugoslavia) . . . 177

Simultaneous determination of lead, copper, cadmium and zinc in pure zirconium metal by differential-pulse anodic stripping voltammetry
S. S. Dhaktode (Bombay, India) . . . 181

Determination of traces of palladium by adsorptive stripping voltammetry of the dimethylglyoxime complex
J. Wang and K. Varughese (Las Cruces, NM, U.S.A.) . . . 185

Sandwich techniques in flow injection analysis. Part 1. Continuous recalibration techniques for process control
J. Alonso, J. Bartrolí, M. del Valle, M. Escalada and R. Barber (Barcelona, Spain) . . . 191

Correlation steam/solid chromatography of trace organic compounds in water
M. Koel, M. Kaljurand and E. Küllik (Tallinn, U.S.S.R.) . . . 197

Determination of paraquat by flow-injection spectrophotometry
E. Chico Guijarro, P. Yáñez-Sedeño and L. M. Polo Díez (Madrid, Spain) . . . 203

Preconcentration of copper with the ion-pair of 1,10-phenanthroline and tetraphenylborate on naphthalene
M. Satake, G. Kano (Fukui, Japan), B. K. Puri (New Delhi, India) and S. Usami (Toyama, Japan) . . . 209

Spectrofluorimetric determination of proguanil in biological fluids
O. R. Idowu (Ibadan, Nigeria) . . . 215

Continuous-flow determination of manganese in natural waters containing iron
D. J. Hydes (Goldalming, Gt. Britain) . . . 221

Spectrofluorimetric determination of 1,4-thienodiazepines
F. U. Sanchez, J. R. Procopio and L. H. Hernandez-Hernandez (Madrid, Spain) . . . 227

Detection of nitrobenzene and related aromatics by reduction and indophenol formation
K. K. Verma and D. Gupta (Jabalpur, India) . . . 233

Spectrophotometric determination of perchlorate after extraction of its Brilliant Green ion-pair with microcrystalline benzophenone
D. Thorburn Burns and N. Tungkananuruk (Belfast, Northern Ireland) . . . 237

Spectrophotometric determination of manganese(VII) after extraction with the ethylene-bis(triphenylphosphonium) cation
D. Thorburn Burns and D. Chimpalee (Belfast, Northern Ireland) . . . 241

Determination of traces of boron in semiconductor amorphous silicon film by filament-vaporization inductively-coupled plasma/atomic emission spectrometry
E. Kitazume (Iwate, Japan), S. Ishioka and E. Mitani (Tokyo, Japan) . . . 245

The effect of the ordered phase CuAu on the accuracy of emission analysis of gold alloys
R. de Marco, D. J. Kew (Melbourne, Australia) and J. V. Sullivan (Clayton, Vic., Australia) . . . 249

Echelle-spectrometer/image-dissector system for elemental quantitation by continuous-source atomic absorption spectrometry
R. Masters, C. Hsiech and H. L. Pardue (West Lafayette, IN, U.S.A.) . . . 253

The coprecipitation of an organophosphate fraction from harbour water for x-ray fluorescence spectrometry
F. Ahern, J. M. Eckert, S. F. Hain, K. E. A. Leggett, N. C. Payne and K. L. Williams (Sydney, Australia) . . . 259

Long-term stability of a gas chromatography/mass spectrometry system in quantitative gas analysis
H. Egsgaard and E. Larsen (Roskilde, Denmark) . . . 265

Book Reviews . . . 271

Software Reviews . . . 291

Author Index . . . 295
